- Learn the basic concepts first and start with the easy level of questions.
- Trick to score marks in Quantitative Aptitude Section is to attempt the questions from the topics like Quadratic Equations, Simplification and Approximation first and then going for Number Series.
- After that, go for Data Interpretation as this is the topic which comprises of approx. 50% of the paper. Also, now the DI is coming which is based on arithmetic topics so it become important to have good command on some of the arithmetic topics like Time and Work, Time, Speed and Distance, SI and CI.
